Narrative:

At 9:40 AM, a West L.A. College (WLAC) student was found in her parked car in respiratory distress. The student was having difficulty breathing and a friend, inside n the car, said she was having an asthma attack. The student appeared to be choking on something and her pupils became restricted. She also had a glossy stare on her face. Believing she might be choking on something, a deputy pulled her out of the driver's seat and positioned her in a prone position. The deputy gave thrusts to her stomach area to try and dislodge what might have been causing the blockage in her airway. After the first thrust to her stomach area, an extremely large piece of mucous/saliva was released from her mouth. The gave another thrust to the student and another large mucous/saliva. The student was eventually transported to a nearby hospital.
